In Spring and towards the end of October there exists a risk of flooding on the rivers Baïse, Lot and Garonne (but not on the "Canal Latéral à la Garonne"). The locks on the Canal are semi-automatic and are controlled by traffic lights. On the Baïse the locks are automatic and are operated by a magnetic card, on the Lot as well, where there are also lock-keepers on hand. On these two rivers the locks are open every day. To reach the Lot involves crossing the Garonne (risk of drought). The traverse is possible on four days of the week using the services of a pilot at a cost of around 12 €.

These cruises operate in either direction.
